

ORLEN OIL RIDER SCOOTER 2T

General features

Semi-synthetic oil designed for two-stroke scooters for city driving or high-performance on the open road. The HTS (High Temperature Stability) formula provides effective lubrication even at high temperatures. The oil prevents burning and wear of piston rings and pistons as well as protects against deposits on the spark plug. It meets the highest quality specification of JASO (Japanese Automotive Standards Organization). Dosage: in accordance with engine manufacturer's recommendations, 2% oil to fuel ratio /1:50/ if the engine manufacturer does not recommend otherwise.

Application

Designed for lubrication of two-stroke engines in motorcycles, mopeds and scooters, as well as snowmobiles and quads. Suitable for mixing or individual lubrication.

Quality class

API: TC

JASO: FD

ISO-L-EGD

Physical and chemical properties

Parameters	Unit	Typical values
Kinematic viscosity at 100 °C	mm ² /s	8,5
Viscosity index	-	125
Pour point	°C	-21
Flash point	°C	95
Sulfated ash	%m/m	0,1

Note: Physicochemical parameters listed in the table are typical values. Real values are stated in quality control certificates attached to each production batch.
